

# FIRE FIGHTING RESERVE

## ClearWater Tanks

In the event of a fire, your water tank could become crucial in saving your home or property. ClearWater Steel Liner Tanks are suitable for use as a dual purpose, water storage tank with integrated fire fighting reserve simply by changing the outlet design.

### WHY CHOOSE US!

- ✓ Tanks are made-to-order depending on requirements
- ✓ Tanks can be customised to suit your application
- ✓ Integrated fire fighting reserves to meet Council regulations

### Water Reserve

By fitting an additional outlet ... a water reserve can be created that is always available in the event of a fire.

The lowest water level reaches the bottom of the tank water outlet (top outlet) leaving water below that isn't accessible without using the lower outlet with Storz fitting.

### Storz Fitting

Fire fighting equipment can be connected to the Storz fitting to access any available water in the tank; with a reserve always available in an emergency.

When opting for a Steel Liner Tank with Fire Fighting Reserve installation, please be aware that this will reduce the overall water capacity of your tank.
